## SUMMARY OF WILDLIFE STRIKE DATA ANALYSIS

- ✓ Seasonal event.
- ✓ Trendlines steady during last 8-years period.
- ✓ The ratio of Negligible's events to Other's with consequences is 20 to 1.
- ✓ Approach and Landing represent the most critical phases with more than 60% of reported events.
- ✓ Coastal aerodromes are more exposed to the phenomenon.

**AN EXAMPLE OF PREDICTIVE APPROACH**

# AVIATION SAFETY WORKSHOP

## PROSPERO EU FP7: AN EXAMPLE OF PREDICTIVE APPROACH

### DESCRIPTION

PROSPERO (PROactive Safety PERformance for Operations) is a European 7th Framework project that runs from 2012 through 2015 and comprises 14 partner organisations across 7 countries. The consortium includes end-users, industry, SMEs and academic partners.

PROSPERO expected to develop, implement and evaluate a prototype management system for identifying and actively managing systemic risks, including complex interactions, in the Air Transport System.

# AVIATION SAFETY WORKSHOP

## PROSPERO EU FP7: AN EXAMPLE OF PREDICTIVE APPROACH

### MOVING INTO PREDICTIVE APPROACH

#### Reactive (Past)

- Respond to events that have already happened such as incidents and accidents.

#### Proactive (Present)

- Identify hazards before they materialise into incidents or accidents and taking the necessary actions to reduce the safety risks.

#### Predictive (Future)

- Capability to anticipate and prevent incidents through the support of extensive data with the aim to intercept a risk pattern, or set of pre-conditions, physically or temporarily present within an operational risk scenario.

## PROSPERO EU FP7: AN EXAMPLE OF PREDICTIVE APPROACH

### EXAMPLE OF RISK PATTERN

Example of a segment of risk patterns behind birdstrike events in **red** a risky configuration (data simplified for GDPM 2018).

Variables						
Month	T.o.D. (Light conditions)	Altitude at first event (Aircraft altitude)	Number seen	Size of birds	Part(s) of Aircraft Struck	Predicted probability
ott	Night/dark	99,3	11+	Small	windshield/Cockpit	,06698
ott	Night/dark	1913,8	1	Small	Wing/s	,03059
<b>ott</b>	<b>Night/moonlight</b>	<b>397,1</b>	<b>1</b>	<b>Small</b>	<b>Wing/s</b>	<b>,68594</b>
ott	Daylight	3000,0	2-10	Medium	Multiple	,21994
ott	Daylight	,0	1	Large	Fuselage	,05139

Baranzini, D., & Zanin, M. (2015). Risk prediction and risk intelligence in aviation—the next generation of aviation risk concepts from PROSPERO FP7 project. *Safety and Reliability of Complex Engineered Systems, 1917-1920*. doi:10.1201/b19094-249

- ✓ Data highlighted that phenomenon is steady over the years and under control.
- ✓ Develop techniques to make predictions about future events for improving crew alertness.
- ✓ PROSPERO EU Project has somehow demonstrated the importance to have the capability to anticipate and prevent incidents through the support of extensive data, integrating operational database from different stakeholders.

**THANK YOU**  
**GRAZIE**
